The 2001 Merrifield Award/Rao Makineni Lecture

From Merrifield to MetaPhore: A Random Walk with Serendipity <i>Garland R. Marshall</i>	3
Genomics: From Microbes to Man <i>J. Craig Venter</i>	13

Synthetic Methodologies, Solid Phase Synthesis, Solid Phase Organic Synthesis, Combinatorial Techniques

Fluorous Methods for Synthesis and Separation of Organic Molecules: From Separating Mixtures to Making Mixtures <i>Dennis P. Curran</i>	17
Synthesis of β and γ -Substituted Prolines for Conformation-Activity Relationship Studies of the α -MSH Analogue MT-II <i>Chaozhong Cai, Wei Wang, Chiyi Xiong, Vadim A. Soloshonok, Minying Cai and Victor J. Hruby</i>	20
The General Asymmetric Synthesis of <i>Syn</i> - and <i>Anti</i> - β -substituted Cysteine and Serine Derivatives <i>Chiyi Xiong, Wei Wang and Victor J. Hruby</i>	22
The Novel Asymmetric Synthesis of β -Functionalized Phenylalanine Derivatives <i>Chiyi Xiong, Wei Wang, Chaozhong Cai and Victor J. Hruby</i>	24
An Efficient Method for Large-Scale Synthesis of Stereochemically Defined and Conformationally Constrained β -Substituted or α,β -Disubstituted Amino Acids <i>Xuejun Tang, Vadim A. Soloshonok and Victor J. Hruby</i>	26

Contents

Synthesis of Amino Acids with Novel Biophysical Properties <i>Zhanna Zhilina, Isabel Alves, Scott Cowell, Xuejun Tang, Malcolm Kavarana and Victor J. Hruby</i>	28
Two Novel and Efficient Approaches to Synthesis of Enantiopure Dipeptide β -Turn Mimetics: Indolizidinone Amino Acids <i>Wei Wang, Chiyi Xiong, Jiangqian Yang and Victor J. Hruby</i>	30
Enantioselective Synthesis of β^2 -Homotryptophan for a Somatostatin Mimetic <i>Peter Micuch and Dieter Seebach</i>	32
Ethyl Nitroacetate as a Useful Synthone for the Synthesis of Orthogonally Protected, Poly-Functional $C^{\alpha,\alpha}$ -Disubstituted Amino Acids <i>Yanwen Fu, Lars G. J. Hammarström, Tod J. Miller, Mark L. McLaughlin and Robert P. Hammer</i>	34
Synthesis of β -Benzo[<i>b</i>]thiophene Dehydroamino Acids by Suzuki Palladium Catalyzed Cross Coupling <i>Paula M. T. Ferreira, Hernâni L. S. Maia, Luís S. Monteiro, Maria-João R. P. Queiroz and Natália Silva</i>	36
Efficient Diastereoselective Synthesis of a Hydroxyethylene Dipeptide Isostere <i>Satendra Singh, Pius Baur and Michael W. Pennington</i>	38
One-Pot Conversion of Azides to Protected Guanidines <i>via</i> the Staudinger Reduction; Synthesis and Utilization of the Phe-Arg Hydroxyethylene Dipeptide Isostere <i>Matthias Brewer and Daniel H. Rich</i>	40
The Synthesis of Tyrosine Mimetics <i>via</i> a Novel N(1)-C(4) Beta-Lactam Cleavage Reaction <i>Larry A. Cabell, David R. Coleman, IV and John S. McMurray</i>	42
Michael Additions to Dehydroalanine Derivatives <i>Luís S. Monteiro, Paula M.T. Ferreira, Hernâni L.S. Maia and Joana Sacramento</i>	44
Facile Synthesis of a Constrained Dipeptide Unit (DPU) for Use as a β -Sheet Promoter <i>Umut Oguz, Ted J. Gauthier and Mark L. McLaughlin</i>	46
Synthesis of N^{α} -(Fluoren-9-ylmethoxycarbonyl)- N^{ϵ} -[(7-methoxycoumarin-4-yl)- acetyl]-L-lysine for Use in Solid-Phase Synthesis of Fluorogenic Substrates <i>Navdeep Malkar and Gregg B. Fields</i>	48
Preparation of β -Amino- α -mercapto Acids and Amides: Stereocontrolled Syntheses of 2'-Sulfur Analogues of the Taxol C-13 Side Chain, Both <i>syn</i> and <i>anti</i> S-Acetyl-N-benzoyl-3-phenylisocysteine <i>Sang-Hyeup Lee, Juyoung Yoon, Kensuke Nakamura and Yoon-Sik Lee</i>	50
New Approach for Preparation of C-Glycoamino Acid Building Blocks <i>Istvan Jablonkai</i>	52
New Quencher Derivatives for Fluorescence Quenching Peptide Assays <i>T. A. Walton, D. J. Dick, D. Hudson, M. K. Johansson, M. H. Lyttle, M. F. Songster and R.M. Cook</i>	54

Contents

Preparation of (2 <i>S</i>)-2-Amino-3-(2-(2,2,5,7,8-pentamethylchroman-6-sulfonyl)-1 <i>H</i> -indol-3-yl)-propionic acid and Its Incorporation into Antibacterial Lactoferricin Peptides <i>Bengt Erik Haug and John S. Svendsen</i>	56
UniChemo Protection (UCP) <i>Les Miranda and Morten Meldal</i>	58
An Improved Synthesis of Fmoc-Asp(O-3-methylpent-3-yl)-OH, an Aspartate Derivative That Resists Base Induced Aspartimide Formation <i>James G. Boyd and Wen Lin</i>	61
Systematic Investigation of the Aspartimide Problem <i>M. Mergler, F. Dick, B. Sax, P. Weiler and T. Vorherr</i>	63
Ninhydrin as a Reversible Protecting Group of N-Terminal Cysteine <i>Chadler T. Pool, James G. Boyd and James P. Tam</i>	65
Novel Synthesis and Application of a Protected Bicyclic α -Helix-Initiating Heptapeptide Suitable for Segment Condensation Syntheses: Utility of Pentaamincobalt(III) for Carboxyl Protection <i>John W. Taylor, Prasanna Reddy, Ketel Patel, Tom Dineen and Sumreen Naqvi</i>	67
N^{in} -4-Nitrobenzenesulfonyl Tryptophan: A Convenient Preparation of N^{α} -Boc and N^{α} -Fmoc Derivatives <i>Aydar Sabirov and Anita Hong</i>	69
Syntheses of Difficult Hydrophobic Sequences Using 2-(4-Nitrophenyl)sulfonyl-ethoxycarbonyl(Nsc)- N^{α} -(2-hydroxy-4-methoxybenzyl)Ala-OH: (Ala) ₁₀ -Valine, (Ala) ₁₅ -Valine <i>Hyun Jin Lee, Weonu Chweh, Young-Deug Kim, Sang-Sun Lee and Hack-Joo Kim</i>	71
A Highly Efficient Method for Synthesis of Fmoc-Lysine(Mmt)-OH <i>Xiao-He Tong and Anita Hong</i>	73
A New Practical Approach to the Synthesis of Fmoc-L-Cysteine <i>Ming Zhao</i>	75
A Novel Protocol of Solid Phase Peptide Synthesis with 2-(4-Nitrophenyl)sulfonylethoxycarbonyl(Nsc)-Amino Acids <i>Hack-Joo Kim, Chan-Young Ko, Jeong Su Jang and Young-Deug Kim</i>	77
S-Xanthenyl Protected 1-Thiosugars as Building Blocks for Glycopeptide Assembly <i>Robert A. Falconer</i>	79
Late Deprotection Difficulties During SPPS Depend on the Preceding Sequence <i>Phillip W. Banda</i>	81
Towards a Selective Boc Deprotection on Acid Cleavable Resin <i>Florine Cavalier, Valérie Lejeune and Jean Martinez</i>	83
By-Product Formation During SPPS of Linear, Cyclic, and Novel Bicyclic Peptides as AChE Inhibitors <i>Peteris Romanovskis, Terrone L. Rosenberry, Bernadette Cusack and Arno F. Spatola</i>	85

Contents

Acidic Cleavage of the Side Chain Protecting Groups of Peptides Attached to a Modified Polystyrene Carrier: Synthesis of Peptide Generics <i>Luděk Lepša, Anna Ammerová and Martin Flegel</i>	87
The Use of a Novel Safety Catch Linker for BOC-Based Assembly of Cyclic Peptide Libraries <i>Simon W. Golding, Gregory T. Bourne, Wim D. F. Meutermans, Alun Jones and Mark L. Smythe</i>	89
Diurethanyl 1 <i>H</i> -Benzotriazole-1-carboxamidines as Guanidinyllating Reagents <i>Hans-Jürgen Musiol and Luis Moroder</i>	91
Amino Acid Bromides: A Convenient Choice for Very Difficult Couplings <i>Alma DalPozzo, Roberto Bergonzi, Minghong Ni and Paola Cossettini</i>	93
Synthesis of the Two Isomeric Benzo Derivatives of 1-Hydroxy-7-azabenzotriazole and Preliminary Studies of Their Effectiveness as Coupling Reagents <i>Fernando J. Ferrer and Louis A. Carpino</i>	95
Optimization of Coupling Methods for the Introduction of Mono-Benzyl Phosphate Esters of Fmoc Protected Phosphoamino Acids <i>Peter White</i>	97
HATU-HOAt-CuCl ₂ : A Reliable Racemization-Free Segment Coupling System <i>Yasuhiro Nishiyama, Sou Ishizuka and Keisuke Kurita</i>	99
Search for a Safe, Inexpensive and Convenient Amidation Process for Protected Amino Acids and/or Peptides <i>Kripa Srivastava</i>	101
Extending Synthetic Access to Proteins <i>John L. Offer and Philip E. Dawson</i>	103
A New Scaffold for Amide Ligation <i>Chiara Maranzi, John Offer and Philip E. Dawson</i>	105
Chemical Ligation of Multiple Peptide Fragments Using a New Protection Strategy <i>Matteo Villain, Jean Vizzavona and Hubert Gaertner</i>	107
Synthesis of Oligodeoxynucleotide-Peptide Conjugates Using Hydrazone Chemical Ligation <i>Oleg Melnyk, Nathalie Ollivier, Christophe Olivier, Catherine Gouyette, Tam Huynh-Dinh and Hélène Gras-Masse</i>	109
The Use of a Free Peptide for Preparation of a C-Terminal Building Block for Polypeptide Synthesis in Combination with a Peptide Thioester <i>Saburo Aimoto, Kenta Teruya, Koki Hasegawa, Kenichi Akaji and Toru Kawakami</i>	111
Synthesis of N to C Terminal Cyclic Analogues of α -Conotoxin ImI by Chemoselective Ligation of Unprotected Linear Precursors <i>Christopher J. Armshaw, Julie Dutton, Ron C. Hogg, David J. Adams, David J. Craik and Paul F. Alewood</i>	113
Total Chemical Synthesis of κ -Casein Using Native Ligation Methodology <i>Paramjit S. Bansal and Paul F. Alewood</i>	115

Contents

Fmoc Chemistry Compatible Methods for Thio-Ligation Assembly of Proteins <i>S. Biancalana, D. Hudson, M. F. Songster and S. A. Thompson</i>	117
Simultaneous Lipidation of a Multi-Epitope Peptide Cocktail by Chemoselective Hydrazone Formation <i>Line Bourel-Bonnet, Oleg Melnyk, Frédéric Malingue, Pascal Joly, Dominique Bonnet and H�el�ene Gras-Masse</i>	119
Privilege Structures: New Strategies for the Synthesis of Cyclic Tetrapeptides <i>Wim D. F. Meutermans, Simon W. Golding, Marc R. Campitelli, Douglas A. Horton, Gregory T. Bourne and Mark L. Smythe</i>	122
Incorporation of a cis-Amide Bond Isostere in the Synthesis of Cyclic Tetrapeptides <i>Gregory T. Bourne, Peter J. Cassidy, Wim D. F. Meutermans, Marc R. Campitelli and Mark L. Smythe</i>	125
Covalent Control of Shape and Folding in Peptides by Ring-Closing Metathesis <i>Rob M. J. Liskamp, John F. Reichwein, Bas Wels, John A.W. Kruijtzter and Cees Versluis</i>	127
New Synthetic Routes to N-EtXaa ⁴ -Cyclosporin Derivatives as Potential Anti-HIV Drugs <i>T. Muamba, F. Hubler, J.-F. Guichou, L. Patiny, T. R�uckle, L. Brunner, R. Wenger and M. Mutter</i>	130
Transition Metal Complexes of Linear and Cyclic Pseudopeptides <i>Siegmond Reissmann, Sebastian K�unzel, Regina Reissmann, Susanne Nolden, Georg Greiner, Inge Agricola, Dietmar Strehlow, Wolfgang Poppitz, Raiker Witter and Ulrich Sternberg</i>	132
An Efficient Synthesis of Integrin Antagonists cyclo(-RGDfK-), cyclo(-GRGDfK-) and Their Conjugates with MAG3 Chelate <i>Vladimir V. Samukov, Pavel I. Pozdnyakov, Aydar N. Sabirov, Irina M. Bushueva, Paul O. Zamora and Prantika Som</i>	134
Design and Synthesis of Cyclic Peptide Antagonists Intended to Block Coactivator Binding to Steroid Nuclear Receptors <i>Anne-Marie Leduc, Kelli S. Bramlett, Thomas P. Burris and Arno F. Spatola</i>	136
A Novel Design and Synthesis of Bicyclic Peptide Library <i>Ying Sun, Guishen Lu and James P. Tam</i>	138
Strategies for the Synthesis of Cyclic Peptides <i>Ashok Khatri, Nicholas P. Ambulos, Steven A. Kates, Katalin F. Medzihradzky, George �sapay, Henriette Remmer and Arpad Somogyi</i>	140
Vinyl Sulfide Cyclized Analogues of Angiotensin II with High Affinity to the AT ₁ -Receptor <i>Petra Johannesson, Gunnar Lindeberg, Gregory V. Nikiforovich, Anja Johansson, Adolf Gogoll, Anders Karl�en and Anders Hallberg</i>	142
Strategies for the Synthesis of Novel Head-to-Side Chain Cyclic Peptides: Application to Dynorphin A Analogs <i>Balvinder S. Vig and Jane V. Aldrich</i>	144

Contents

Study on the Influence of Different Metal Ions on Cyclization of Linear Pentapeptides and Heptapeptide <i>Yun-hua Ye, Mian Liu, Yan-chun Tang and Xiao-hui Jiang</i>	146
Disulfide Bond Formation of a Hydrophobic Peptide by Dimethyl Sulfoxide <i>Jingming Zhang and Lili Guo</i>	148
Stereoselective Synthesis of Transition State Analog Inhibitors of DPP-IV Using 2-Substituted Thiazoles <i>J. Piron and D. Tourwé</i>	150
Original and General Strategy of Dimerization of Bioactive Molecules <i>Florine Cavelier, Matthieu Giraud, Nicole Bernad and Jean Martinez</i>	152
An Efficient Approach for the Synthesis of Salmon Calcitonin Using Oxazolidine Dipeptides <i>Weonu Chweh, Hyun Jin Lee, Young-Deug Kim, Sang Sun Lee and Hack-Joo Kim</i>	155
A Combined Solid-Phase and Solution Strategy for Chemical Synthesis of Human Leptin <i>Yuji Nishiuchi, Tatsuya Inui, Hideki Nishio and Terutoshi Kimura</i>	157
Synthesis of Phosphorylated Polypeptide by the Thioester Method Using a Recombinant Protein <i>Toru Kawakami, Koki Hasegawa, Kenta Teruya, Kenichi Akaji, Masataka Horiuchi, Fuyuhiko Inagaki, Yasuyuki Kurihara, Seiichi Uesugi and Saburo Aimoto</i>	160
The Synthesis of the K-Ras-Derived Peptide <i>Xiao-He Tong, Xiaowei Zhang, Lei Liu and Anita Hong</i>	162
Synthesis of Phosphopeptides on Solid Phase Using <i>tert</i> -Butyl- <i>H</i> -phosphonate Salts <i>Gábor K. Tóth, András Molnár and Zoltán Kupihár</i>	164
Solid Phase Synthesis of Seleno-Methionine Peptides by tBoc/Bzl and Fmoc/tBu Protection Strategy Suitable for the Crystallographic Phase Determination by <i>Multi-Wavelength Anomalous Diffraction</i> (MAD) <i>Stefan R. K. Hoffmann, Christine A. Deillon and Bernd Gutte</i>	166
Synthesis of a C-Terminal Fluorescein-Labeled 36-mer Peptide <i>Reagan J. Greene, Jonathan M. White, Catherine J. Mader, Ralph A. Picking, J. William Lackey, Joel B. Erickson and Dennis M. Lambert</i>	168
Expanding Diversity: Modification of Linear and Cyclic Peptides by C-Glycosylation and N-Methylation <i>Florence Brunel, Anne-Marie Leduc, Sujan Singh, Xiaoping Tang, David M. Vogel, K. Grant Taylor and Arno F. Spatola</i>	170
One-Dimensional Spatial Encoding: Split/Mix Synthetic Parallelism with Tag-Free Identification and Assays at the Speed of Light <i>Alan W. Schwabacher and Peter Geissinger</i>	172
Spatial Screening of Lectin Ligands. Cyclic Peptides as Scaffolds for Multivalent Presentation of Carbohydrates <i>Valentin Wittmann and Sonja Seeberger</i>	174

Contents

Combinatorial Syntheses of Polyhydroxamate Siderophores: Desferrioxamine, Exochelin, Mycobactin, and Aerobactin Libraries <i>Urszula Slomczynska, P. Amruta Reddy, Otto F. Schall, Todd Osiek, Arati Naik, W. Barry Edwards, James Wheatley and Garland R. Marshall</i>	177
Identification of Peptide Ligands for $\alpha 4\beta 1$ Integrin Receptor as Potential Targeting Agents for Non-Hodgkin's Lymphoma <i>Steven I. Park, Renil Manat, Brian Vikstrom, Nail Amro and Kit S. Lam</i>	180
Development of Peptidomimetic Substrates and Inhibitors that Bind to the Peptide Binding Pocket of the Catalytic Site of p60 ^{c-src} Protein Tyrosine Kinase <i>Jayesh R. Kamath, Ruiwu Liu, Amanda M. Enstrom, Gang Liu and Kit S. Lam</i>	183
Pseudoproline Libraries for Tuning Inhibitors of SH3 Domain Mediated Protein-Protein Interactions <i>Jimena Fernandez-Carneado, Patricia Durieux, Luc Patiny, Yoshiro Tatsu, Daniel Grell, Christian Kardinal, Stephan Feller and Gabriele Tuchscherer</i>	185
Towards a Set of Peptides with Orthogonal HIV Seroreactivity Using Adaptively Coded Peptide Libraries: Decoding by Mass Spectrometry and Immunofluorescent Screening <i>Christian Hoffmann, Dierk Blechschmidt, Ralf Krüger, Michael Karas, Christoph Königs, Ursula Dietrich and Christian Griesinger</i>	187
Mapping of Discontinuous Epitopes on FSH <i>Jerry W. Slootstra, Wouter C. Puijk, Rob H. Meloen and Wim M. M. Schaaper</i>	189
Development of Highly Specific, Membrane Permeable Peptide Blockers of cGMP-Dependent Protein Kinase Utilizing Affinity Selection from Peptide Libraries <i>Werner Tegge, Ronald Frank, Mark S. Taylor, Joseph E. Brayden, Christian K. Nickl and Wolfgang R.G. Dostmann</i>	191
The Integration of Positional Scanning Libraries with Bioinformatics and Proteomics <i>Clemencia Pinilla, Eva Borràs, Roland Martin, Yingdong Zhao and Richard Simon</i>	194
Screening and Synthesis of a Positional Scanning Library Based on the Bowman-Birk Reactive Site Loop <i>Emma M. Watson, Jeffrey D. McBride and Robin J Leatherbarrow</i>	196
A Bicyclic Peptide Template Useful for Solution-Phase Combinatorial Synthesis <i>Qingchai Xu and Frans Borremans</i>	198
Synthesis of Combinatorial Libraries Associated with Constrained β -Turn Mimetics <i>James Dattilo, Chris Lum, Stephanie Beigle-Orme, Burt Goodman, Vince Huber, Jeff Keilman, Cheryl Schwenk, Gangadhar Nagula, Nataly Hawthorn, Jennifer Young and Tomáš Vaisar</i>	200

Contents

Screening and Design of Hybrid Peptide That Binds with Glucose Oxidase <i>Kenji Yokoyama, Toshifumi Sakai, Hideo Ishikawa, Yasutaka Morita and Eiichi Tamiya</i>	202
Combinatorial Synthesis, Screening and Testing of Peptidic RNA-Ligands <i>Michael Baumann, Delf Schmid, Hilmar Bischoff, Christoph Königs, Ursula Dietrich and Christian Griesinger</i>	204
High Throughput Peptide Syntheses Generate Ligands for Proteomic Database <i>Lin Chen, Brian Korenstein, Michael James, Leonid Kvecher and J. Mark Carter</i>	206
MHC Ligand Motifs from Peptide Libraries: The Software EPIPREDICT <i>B. Fleckenstein, G. Jung, K.H. Wiesmueller, F. von der Muelbe, D. Niethammer and J. T. Wessels</i>	208
High-Density Compound Arrays of Combinatorial Chemical Libraries by a New Pen-Directed and Computer-Navigated Plotter Device <i>Stefan R. K. Hoffmann</i>	210
Combining SPOT Synthesis and Native Chemical Ligation to Generate Large Arrays of Small Protein Domains <i>Florian Toepert, Tobias Knaute, Stefan Guffler and Jens Schneider-Mergener</i>	212
Peptides as Drugs: Is There a Market? <i>Albert Loffet</i>	214
Solid-Phase Total Syntheses of Trunkamide A and Kahalalide F, Cyclic Peptides from Marine Origin <i>Fernando Albericio, Josep M. Caba, Àngel López-Macià, Jose C. Jiménez, Marta Carrascal, Laia Solé, Ignacio Rodriguez, Ignacio Manzanares, Miriam Royo and Ernest Giralt</i>	217
Solid Phase Synthesis of Large Cyclic Peptides <i>Katri Rosenthal-Aizman and Anders Undén</i>	220
Solid-Phase Synthesis of Consolidated Ligands Containing an Intramolecular Lactam Bridge: Comparison of Strategies and Tactics <i>Jaya T. Varkey, David Cowburn, Hong Ji and George Barany</i>	222
Backbone Amide Linker (BAL)/Fmoc Synthesis of Peptide Thioester Intermediates Required for Native Chemical Ligation <i>Dominique Lelièvre and George Barany</i>	224
Ampullosporin Analogs: Solid Phase Synthesis, Conformational Studies, and Biological Activities <i>Hoai Huong Nguyen, Diana Imhof, Brigitte Schlegel, Albert Härtl, Matthias Kronen, Udo Gräfe and Siegmund Reissmann</i>	226
Synthesis of Lanthionine-Containing Peptides on Solid Phase <i>via</i> an Orthogonal Protecting Group Strategy <i>M. F. Mohd Mustapa, A. B. Tabor, N. A. L. Chubb and D. Schulz</i>	228
Systematic Solid Phase Synthesis of Linear Pseudooligolysines Containing Multiple Adjacent CH ₂ NH Amide Bond Surrogates: Potential Agents for Gene Delivery <i>Gil Fridkin, Tamar Gilon, Abrahm Loyter and Chaim Gilon</i>	230

Contents

Peptide Transformation and Synthesis of Oligopeptidomimetics <i>Rob M. J. Liskamp, John A. W. Kruijtzter, Lovina J. F. Hofmeyer, Astrid Boeijen, Arwin J. Brouwer and Menno C. F. Monnee</i>	232
A New Strategy for Inverse Solid-Phase Peptide Synthesis <i>Qingchai Xu and William G. Gutheil</i>	234
Optimization of the Chemical Synthesis of Human Ghrelin <i>David B. Flora, Min Liu, Julia A. Drane, Patrick J. Edwards and John P. Mayer</i>	236
Rational Design and Synthesis of a Potent Amide-Linked Cyclic Analogue of MBP87-99 Based on 2D-NMR Studies and Molecular Dynamics <i>Ioanna Daliani, Theodore Tselios, Lesley Probert, Spyros Deraos, Thomas Mavromoustakos and John Matsoukas</i>	238
Solid-Phase Synthesis Utilizing Azido- α -Amino Acids: Reduction of Azido-Protected Proline <i>Parissa Heshmati, James Whitehurst and Garland R. Marshall</i>	240
Improved Fmoc-Solid Phase Synthesis of β -Amyloid Peptides Using DBU as N^α -Deprotection Reagent <i>Anna K. Tickler, Colin J. Barrow and John D. Wade</i>	242
Triphosgene as Peptide Coupling Reagent: Highly Efficient Total Synthesis of Cyclosporin O <i>Bernd Thern, Joachim Rudolph and Günther Jung</i>	244
Synthesis of Ferrocene Linkers for Solid-Phase Synthesis of Peptides <i>José Giraldeés and Mark L. McLaughlin</i>	246
Efficient HF Conditions for Suppressing Trp Modification Associated with Use of the N^{in} -Cyclohexyloxycarbonyl (Hoc) Group <i>Hideki Nishio, Yuji Nishiuchi, Tatsuya Inui, Makoto Nakata, Kumiko Yoshizawa-Kumagaye and Terutoshi Kimura</i>	248
Structural Characterization of a Dibenzylated-CGRP(8-37), a Byproduct from N - α -Benzylation of CGRP(8-37) <i>D. David Smith, Martin Hulce, David J. J. Waugh and Peter W. Abel</i>	250
Polyamines as Intermediates for the Synthesis of Heterocyclic Compounds and Oligomeric Heterocyclic Compounds from Resin-Bound Polyamides <i>Adel Nefzi and Richard A. Houghten</i>	252
Solid-Phase Synthesis of Substituted Dihydroimidazoles and Their Bis Analogs <i>Achyuta N. Acharya, John M. Ostresh, Adel Nefzi and Richard A. Houghten</i>	255
Solid Phase Synthesis of 1,2,5-Substituted Derivatives of 4-Imidazolidinone <i>Markéta Rinnová, Agnès Vidal, Adel Nefzi and Richard A. Houghten</i>	257
Solid Phase Synthesis of 1,2,4-Triazinan-3-ones <i>Yongping Yu, John M. Ostresh and Richard A. Houghten</i>	259
Solid-Phase Synthesis of α -Difluoro- β -amino Acids by a Reformatsky Reaction <i>Agnès Vidal, Adel Nefzi and Richard A. Houghten</i>	261

Contents

- Peptidotriazoles: Copper(I)-Catalyzed 1,3-Dipolar Cycloadditions on Solid-Phase [263](#)
Christian W. Tornøe and Morten Meldal
- Solid-Phase Synthesis of Lidocaine Analogues Using Backbone Amide Linker (BAL) Anchoring [265](#)
Simon K. Shannon, Steven A. Kates and George Barany
- Solid-Supported Triazenes as Alkylating Polymers Employed for the Versatile Derivatization of Peptides [267](#)
Joachim Smerdka, Tobias Seyberth, Dietmar G. Schmid, Günther Jung and Jörg Rademann
- Oxidation of Threonine and Serine Residues on Solid-Phase: Pyrazine Formation by Dess-Martin Periodinane Oxidation [269](#)
Caspar Christensen and Morten Meldal
- A Novel Solid Phase Approach to Thioether Cyclized Peptides: Discovery of Mouse Melanocortin-1 Receptor Agonists [271](#)
Jon Bondebjerg, Morten Meldal, Rayna M. Bauzo and Carrie Haskell-Luevano
- Bifurcated Dipeptide Schiff Bases as Ligands for Enantioselective Catalysis: Micro-Metalloenzymes [273](#)
Robin Polt, Brian Dangel, Bhaskar Tadikonda and Brian Kelly
- Recent Advances in the Solid-Phase Synthesis of Long-Chain β -Peptides [275](#)
Jens Frackepohl, Jürg V. Schreiber, Per I. Arvidsson and Dieter Seebach
- Fully Automated Parallel Oligonucleotide Synthesizer [277](#)
Michal Lebl, Christine Burger, Brett Ellman, David Heiner, Georges Ibrahim, Aaron Jones, Mark Nibbe, Jaylynn Pires, Petr Mudra, Vít Pokorný, Pavel Poncar and Karel Ženíšek
- N to C Solid Phase Organic Synthesis of Peptidic and Peptidomimetic Derivatives Using 9-Fluorenylmethyl Esters [279](#)
Sandrine A. M. Mérette, Christopher A. Goodwin, Michael F. Scully and John J. Deadman

Analytical and Biophysical Methods, Peptides and Proteins Folding, De Novo Design of Peptides and Proteins

- A New Method to Quantify the Swelling Properties of Polymer Beads Used in Solid Phase Peptide Synthesis (SPPS) [283](#)
Martin J. Sellers and Peter J. Heggs
- A Novel High Throughput Analysis of Total Nitrogen Content by a Colorimetric Method [285](#)
Kiyoshi Nokihara and Tadashi Yasuhara
- Conformational Studies of Cyclotetrapeptides [Xaa-D-Ala]₂ by NMR, CD and Molecular Modeling [287](#)
Maria Ngu-Schwemlein, Toni Bowie, Rebecca Eden and Frank Zhou

Contents

Conformation of β^3 -Residues-Containing Cyclic Pentapeptide Analogues of the Antitumoral Astin Family <i>Filomena Rossi, Antonia De Capua, Giancarlo Zanotti, Teodorico Tancredi, Pietro Amodeo, Gabriella Saviano, Michele Saviano, Rosa Iacovino and Ettore Benedetti</i>	289
Structure-Activity Relationship of Antimicrobial Peptide, Gaegurin 4, Isolated from Korean Frog <i>Sang-Ho Park and Bong-Jin Lee</i>	291
Tethering of the Proximal Region of the Angiotensin II Receptor (AT _{1A}) C-Terminus to the Cell Membrane <i>Henriette Mozsolits, Sharon Unabia, Walter G. Thomas and Marie-Isabel Aguilar</i>	293
Amide I Frequency as a Probe of Tertiary Structure: FTIR Studies of Helix Bundle Peptides <i>Karen Monteiro, Wendy Barber-Armstrong and Sean M. Decatur</i>	295
Coupled Plasmon Waveguide Resonance Studies of Agonist/Antagonist Binding to the Human δ -Opioid Receptor Provide New Structural Insights Into the Three-State Model for Receptor-Ligand Interactions <i>Z. Salamon, I. Alves, S. Cowell, V. J. Hruby and G. Tollin</i>	297
Structure Elucidation of Peptides with Unnatural Amino Acids Using an Automated Protein Sequencer <i>Ruiwu Liu and Kit S. Lam</i>	299
Structural Study of the Pro-Sequence of Protegrin-3 <i>Jean-Frédéric Sanchez, Yin-Shan Yang, François Hoh, Marie-Paule Strub, Christian Dumas, Jean-Marc Strub, Alain Van Dorsselaer, Robert Lehrer, Tomas Ganz, Alain Chavanieu, Bernard Calas and André Aumelas</i>	301
α -Helix Stabilizing Aromatic-Backbone Interactions <i>Gergely Tóth, Katalin E. Kövér, Jonathan Hirst, Richard F. Murphy and Sándor Lovas</i>	303
Solution Structure of Oligopeptides-Copper(II) Complexes <i>Ilze Vosekalna, Bela Gyurcsik and Erik Larsen</i>	306
Development of Antibodies Against Conjugated Benzophenone, as a Tool in Photoaffinity Crosslinking Studies <i>Dror Yahalom, Michael Rosenblatt and Michael Chorev</i>	308
Monitoring Peptide-Induced Liposome Breakdown with Fluorescence Correlation Spectroscopy <i>Susanne Gangl, M. Knapp, S. Kuepue, G. Koehler and Jack Blazyk</i>	310
NMR Structural Investigation of a β^3 -Dodecapeptide with Proteinogenic Side Chains in MeOH and Water <i>Touraj Etezady-Esfarjani, Christian Hilty, Kurt Wüthrich, Magnus Rueping and Dieter Seebach</i>	312
Conformational Studies on a Synthetic Peptide with Prolactin-Releasing Activity in a Membrane Mimetic Environment <i>A. Di Fenza, S. Albrizio, A. D'Ursi, D. Picone and P. Rovero</i>	314

Contents

Analysis and Characterization of Combinatorial Mixtures of Mucin-2 Antigen Peptides <i>Emöke Windberg, Ferenc Hudecz, Andreas Marquardt, Szilvia Bösze, Ferenc Sebestyén, Hedvig Medzihradzky-Schweiger and Michael Przybylski</i>	316
High Throughput Validation and Quantitation of Synthetic Peptides via LC-MS <i>Lin Chen, Michael James, Brian Korenstein, Brian Miller and J. Mark Carter</i>	318
Synthesis and Solution Three-Dimensional Structure of the Immunodominant Region of Protein G of Human RSV <i>A. Beck, M. Sugawara, J. Czaplicki, C. Klinguer-Hamour, J.-F. Haeuw, T. Nguyen, A. Van Dorsselaer, J.-Y. Bonnefoy and A. Milon</i>	320
Role of Residues in Position 2 and 7 on the Conformation of the N-Terminal Apamin Loop <i>André Aumelas, Léo Barry, Marie France Martin-Eauclaire and Dung Le-Nguyen</i>	322
Conformational Study of [desHis ¹ , desPhe ⁶ , Glu ⁹]glucagon-NH ₂ by 2D-NMR Spectroscopy in the Presence of Perdeuterated Dodecylphosphocholine <i>Jung-Mo Ahn, Neil E. Jacobsen, Michael F. Brown and Victor J. Hruby</i>	324
Molecular Modeling Study of the β -Turn-Type Reversals Involved in 3D Structure of IFABP <i>Gregory V. Nikiforovich and Carl Frieden</i>	326
Structural Features of Short, Linear Peptides in Solution by Fluorescence and Molecular Mechanics Studies <i>Basilio Pispisa, Claudia Mazzuca, Lorenzo Stella, Mariano Venanzi, Antonio Palleschi, Fernando Formaggio, Claudio Toniolo and Quirinus B. Broxterman</i>	328
Influence of Stereochemistry of the Preceding Acyl Residue on the <i>cis/trans</i> Ratio of the Proline Peptide Bond <i>Matej Breznik, Simona Golič Grdadolnik, Gerald Giester, Ivan Leban and Danijel Kikelj</i>	330
The Influence of the Surrounding Media on the Structural Propensities of Amino Acid Residues in Proteins <i>Alex Rubinstein and Simon Sherman</i>	332
CD Evidence of the Conformational Transitions in rMOG[1-125] in the Presence of Membrane Mimicking Detergents <i>Maria Ngu-Schwemlein, Michelle Corzette, Rod Balhorn and Monique Cosman</i>	334
Coacervation and CD and FT-IR Spectroscopic Studies of Elastin-Derived Polypeptide and Its Analogs <i>Kouji Okamoto, Yoshiteru Fukumoto, Iori Maeda, Elemer Vass, Zsuzsanna Majer Gabor Dibo and Miklos Hollosi</i>	336

Contents

Conformational Analysis of Human Calcitonin in Aqueous Solution and Comparison with a Highly Potent Lactam-Bridged Analogue <i>C. M. McIntosh, K. S. Rotondi, M. Dhanasekaran, K. Gunasekaran, A. Kazantzis, A. Kapurniotu and L. M. Gierasch</i>	338
Conformational Studies of a Glycopeptide Recognized with High Affinity by Autoantibodies in Multiple Sclerosis <i>Alfonso Carotenuto, Armida Di Fenza, Elena Nardi, Anna M. Papini and Paolo Rovero</i>	340
Human Relaxin Chain Combination and Folding <i>Jian-Guo Tang, Geoffrey W. Tregear and John D. Wade</i>	342
Effects of Human Leptin Fragments in Hypothalamic Nucleus C-Fos Expression <i>Vani X. Oliveira Jr., M. Terêsa M. Miranda, Jackson C. Bittencourt, Carol F. Elias and Antonio Miranda</i>	344
Introduction of Temperature-Sensitive Elastin-Based Switches to Stabilize Globular Proteins <i>Bin Li, Darwin O. V. Alonso and Valerie Daggett</i>	346
A Short-Range Interaction of the <i>cis-trans</i> Urea Motif in Ureapeptides <i>Michel Marraud, Christine Hemmerlin, Claude Didierjean, André Aubry, Vincent Semetey, Arnaud-Pierre Schaffner, Jean-Paul Briand and Gilles Guichard</i>	348
A New N-Terminal Helix Capping Box <i>Toshimasa Yamazaki, Etsuko Katoh, Tomohisa Hatta, Teruhisa Tomari, Sakurako Tashiro, Heisaburo Shindo and Takeshi Mizuno</i>	350
The Determination of Helix Stability Coefficients Using D-Amino Acid Substitutions in the non-Polar Face of an Amphipathic α -Helical Model Peptide <i>Yuxin Chen, Colin T. Mant and Robert S. Hodges</i>	353
NMR-Based Studies of a Collagenous Substrate of Collagenase <i>Stella Fiori and Luis Moroder</i>	355
Conformational Analysis of Model Polypeptides Having Repetitive Xaa-Pro Sequences <i>Yoshiaki Hirano, Masashi Shimoda, Masahiro Hattori, Masahito Oka and Toshio Hayashi</i>	357
The Role of Unstructured Highly Charged Regions on the Stability and Specificity of Dimerization of Two-Stranded α -Helical Coiled-Coils: Neck Region of Kinesin-Like Motor Protein Kif3A <i>Mundeep S. Chana, Brian P. Tripet and Robert S. Hodges</i>	359
A Leu-Thr-Trp-Lys “Lock” Stabilizes the N-Terminus of the Kinesin Neck Coiled-Coil <i>Brian Tripet and Robert S. Hodges</i>	361
Template-Assisted Stabilization of a Short HIV-1 gp41 Inner-Core Coiled-Coil Peptide <i>Edelmira Cabezas and Arnold C. Satterthwait</i>	363

- Peptidic Inhibitors for Protein-Protein Interactions at Cell Surfaces [647](#)
Horst Kessler, Jürgen Boer, Dirk Gottschling, Niko Schmiedeberg, Christian Röhlz, Vincent Truffault, Bernhard Holzmann, Anja Schuster, Markus Bürgle, Olaf Wilhelm, Viktor Magdolen and Manfred Schmitt
- Prodrug Forms of Peptidomimetic HIV Protease Inhibitors Using Intramolecular Cyclization Reaction [650](#)
Yoshiaki Kiso, Hikaru Matsumoto, Tomonori Hamawaki, Youhei Sohma, Tooru Kimura and Yoshio Hayashi

Contents

Effect of Poly[L-Lysine] Based Polymer Polypeptides on Chemotaxis and Phagocytosis of the Unicellular <i>Tetrahymena pyriformis</i> GL <i>Rita Szabó, Éva Pállinger, Gábor Mezö, László Köhidai and Ferenc Hudecz</i>	652
Costimulatory Blockade by CD28 Peptide Mimics: Suppression of Experimental Autoimmune Encephalomyelitis <i>Mythily Srinivasan, Ingrid E. Gienapp, Connie J. Rogers, Caroline C. Whitacre and Pravin T. P. Kaumaya</i>	654
Design and Synthesis of an Amide-Linked Angiotensin II Analogue with 3,5 Side Chain Bridge: Structural Resemblance of Ring Cluster Conformation with AT ₁ Non-Peptide Antagonists <i>Panagiota Roumelioti, Ludmila Polevaya, Nektarios Giatas, Anastasia Zoga, Ilze Mutule, Tatjana Keivish, Thomas Mavromoustakos, Panagiotis Zoumpoulakis, Demetrios Vlahakos and John Matsoukas</i>	656
Sustained Delivery of an ApolipoproteinE Peptidomimetic Lowers Serum Cholesterol Levels in Dyslipidemic Mice <i>Mysore P. Ramprasad, Arjang Amini, Nandini Katre, David Garber, Manjula Chadda and G. M. Anantharamaiah</i>	658
Design, Synthesis and Biological Evaluation of Novel Non-Peptide Opioid Ligands for Human Pain <i>Xuejun Tang, Xuyuan Gu, Jinfa Ying, Vadim A. Soloshonok and Victor J. Hruby</i>	660
Design and Synthesis of Novel Pure Motilin Antagonists <i>Masayuki Haramura, Akira Okamachi, Kouichi Tsuzuki, Kenji Yogo, Makoto Ikuta, Toshiro Kozono, Hisanori Takanashi and Eigoro Murayama</i>	662
Active Somatostatin Analogues Containing Sugar Amino Acids <i>Sibylle A. W. Gruner, Horst Kessler, Gyorgy Kéri and Aniko Venetianer</i>	664
A Potent Non-Peptide Inhibitor of Anthrax Lethal Factor <i>Venkatachalapathi V. Yalamoori, M. G. de Luna, D. H. Rideout, M. D. Shenderovich, J. H. Zheng, N. Duesberry, S. H. Leppla, C. S. Niemeyer, J. Sun and K. Ramnarayan</i>	666
Highly Potent Analogs of Human Parathyroid Hormone and Human Parathyroid Hormone-Related Protein <i>Jesse Z. Dong, Yeelana Shen, Michael Culler, John E. Taylor, Chee-Wai Woon, Jean-Jacques Legrand, Barry Morgan, Michael Chorev, Michael Rosenblatt, Chizu Nakamoto and Jacques-Pierre Moreau</i>	668
Glucagon-Like Peptide-1 Analogs with Significantly Improved <i>in vivo</i> Activity <i>Jesse Z. Dong, Yeelana Shen, John E. Taylor, Michael Culler, Chee-Wai Woon, Barry Morgan, Steve Skinner and Jacques-Pierre Moreau</i>	670

Contents

Neuropeptide Y (NPY) Y1 Receptor Antagonists <i>V.C. Dhawan, D.E. Mullins, W.T. Chance, S. Sheriff, M. Guzzi, E.M. Parker and A. Balasubramaniam</i>	672
Template-Directed Ligation of Peptides with Nucleobase Amino Acids <i>Sachiko Matsumura, Akihiko Ueno and Hisakazu Mihara</i>	674
A General New Concept for the Development of Opioid Peptide Derived μ -, δ - and κ -Antagonists <i>Peter W. Schiller, Yixin Lu, Grazyna Weltrowska, Irena Berezowska, Brian C. Wilkes, Thi M.-D. Nguyen, Nga N. Chung and Carole Lemieux</i>	676
Synthesis and Pharmacological Activity of Dmt-Tic Analogs with Highly Potent Agonist and Antagonist/Agonist Opioid Activity <i>Remo Guerrini, Gianfranco Balboni, Daniela Rizzi, Girolamo Calo, Sharon D. Bryant, Lawrence H. Lazarus and Severo Salvadori</i>	679
A Novel Cyclic Opioid Peptide Antagonist Containing a Hydroxy Group in Place of the N-Terminal Amino Function <i>Grazyna Weltrowska, Carole Lemieux, Nga N. Chung and Peter W. Schiller</i>	681
Modifications of the Tic Residue in TIPP-Peptides <i>D. Tourwé, S. Van Cauwenberghe, K. Vanommeslaeghe, E. Mannekens, P. Geerlings, G. Toth, A. Péter and J. Csombos</i>	683
Structure-Activity Relationships of Linear and Cyclic Nociceptin Analogs and Conformational Analysis by CD and NMR Spectroscopy <i>Ralf Schmidt, Ibtihal Fadhil, Katharine Carpenter, Joanne Butterworth and Kemal Payza</i>	685
Design and Synthesis of Dynorphin A-(1-11) Analogs with C-Terminal Modifications and Evaluation of their Opioid Activity <i>Kshitij A. Patkar, Thomas F. Murray and Jane V. Aldrich</i>	687
C-Terminal Structure-Activity Relationships for the Novel Opioid Peptide JVA-901 (Venorphin) <i>Christy A. Sasiela, Marco A. Bennett, Thomas F. Murray and Jane V. Aldrich</i>	689
Design and Synthesis of Bifunctional Peptides: Antagonists at CCKA/CCKB Receptors and Agonists at μ/δ Opioid Receptors <i>Richard S. Agnes, Yeon Sun Lee, Peg Davis, Shou-Wu Ma, Josephine Lai, Frank Porreca and Victor J. Hruby</i>	691
Role of the C-Terminal and Central Region of Gastrin for Recognition by the Human CCK ₂ Receptor <i>Shawn I. Ahmed, Felice Wibowo, Dmitry S. Gembitsky, Richard F. Murphy and Sándor Lovas</i>	693
Structure and Peptide Binding Specificity of the SH3 and SH2 Domain from a Self-Regulated Protein Tyrosine Kinase - BTK <i>Jya-Wei Cheng, Shiou-Ru Tzeng and Ming-Tao Pai</i>	695
Pseudoprolines for Studying Bioactive <i>cis</i> -Prolyl Conformations <i>Angela Wittelsberger, Luc Patiny, Jiřina Slaninová and Manfred Mutter</i>	697

Contents

Design of Oxytocin Antagonists Which Are More Selective than Atosiban in Rat Bioassays and in Human Receptor Assays <i>Stoytcho Stoev, Ling Ling Cheng, Maurice Manning, N. C. Wo, W. Y. Chan, Thierry Durroux and Claude Barberis</i>	699
Highly Selective Cyclic Peptides for Human Melanocortin-4 Receptor (MC-4 R): Design, Synthesis, Bioactive Conformation, and Pharmacological Evaluation as an Anti-Obesity Agent <i>Waleed Danho, Joseph Swistok, Adrian Cheung, Xin-Jie Chu, Yao Wang, Li Chen, David Bartkovitz, Vijay Gore, Lida Qi, David Fry, David Greeley, Hongmao Sun, Jeanmarie Guenot, Lucia Franco, Grazyna Kurylko, Leonid Rumennik and Keith Yagaloff</i>	701
SAR of Melanin-concentration Hormone (MCH), an Important Regulatory Hormone in Feeding Behavior <i>Waleed Danho, Joseph Swistok, Wajiha Khan, Theresa Truitt, Anthony Aglione, Ralph Garippa, Kui Xu, Yingsi Chen, Qing Xiang, Jarema Kochan and Fiorenza Falcioni</i>	704
Structure-Activity Relationship Studies (SAR) of Melanocortin Agonists Central His-Phe-Arg-Trp Sequence <i>Jerry Ryan Holder, Rayna M. Bauzo, Zhimin Xiang and Carrie Haskell-Luevano</i>	706
The Development of a Novel Highly Selective and Potent Agonist for Human Melanocortin 4 Receptor <i>Malcolm Kavarana, M. Cai, D. Trivedi, G. Han and Victor J. Hruby</i>	708
Synthesis and NMR Characterization of Melanin-Concentrating Hormone <i>Rosa Maria Vitale, Laura Zaccaro, Benedetto Di Blasio, Roberto Fattorusso, Carla Isernia, Pietro Amodeo, Ettore Benedetti, Michele Saviano and Carlo Pedone</i>	710
Synergism Between Agouti Protein Fragment 91-131 and Melanin Concentrating Hormone <i>Alex N. Eberle, Jozsef Bódi, György Orosz, Helga Süli-Vargha, Verena Jäggin and Urs Zumsteg</i>	712
Development of a Human Growth Hormone Peptide Analogue AOD9604 into an Anti-Obesity Drug <i>Woei-Jia Jiang, Robert Gianello, Mark Heffernan, Esra Ogru, Roksan Libinaki and Frank Ng</i>	714
Rational Approach to Stable, Universal Somatostatin Analogues with Superior Therapeutic Potential <i>Ian Lewis, Wilfried Bauer, Rainer Albert, Nagarajan Chandramouli, Janos Pless, Günter Engel, Gisbert Weckbecker and Christian Bruns</i>	716
N-Methyl Scan of a sst1-Selective Somatostatin (SRIF) Analog <i>Judit Erchegyí, Carl Hoeger, Sandra Wenger, Beatrice Waser, Jean-Claude Schaer, Jean Claude Reubi and Jean E. Rivier</i>	719
Exploring the “Double-Ring” Motif in Bradykinin Antagonists <i>Eunice J. York, Daniel C. Chan, Barbara Helfrich, Paul A. Bunn, Jr., Lajos Gera and John M. Stewart</i>	721

Contents

Conformational Studies of Angiotensin II Cyclic Analogues <i>Vani X. Oliveira, Jr., Shirley Schreier, Fabio Casallanovo, Therezinha B. Paiva, Antonio C. M. Paiva and Antonio Miranda</i>	723
Identification of Key-Residues of Urotensin II, a Potent Mammalian Vasoconstrictor <i>A. Brkovic, P. Lampron, M. Létourneau and A. Fournier</i>	725
Structure-Activity Studies on the Corticotropin Releasing Factor Antagonist Astressin, Minimal Sequence Necessary for Antagonistic Activity: Implications for a New Pharmacophoric Model <i>Dirk T. S. Rijkers, Jack A. J. den Hartog and Rob M. J. Liskamp</i>	727
Solid-Phase Synthesis and Radiolabeling of a Bombesin Peptide Analog for Diagnostic Imaging of Tumors: A Preliminary Report <i>Subhani M. Okarvi</i>	729
Investigation on the Structural Requirements for Binding Integrin $\alpha_{IIb}\beta_3$ <i>Silke Schabbert, Elsa Locardi, Ralph-Heiko Mattern, Michael D. Pierschbacher, Shaokai Jiang and Murray Goodman</i>	731
Linear and Cyclic Peptides for Integrin $\alpha_v\beta_6$ Inhibition <i>Gunther Zischinsky, Ulrich Groth, Beate Diefenbach and Alfred Jonczyk</i>	733
The Synthesis of Collagen Peptides and Characterization of Their Inhibitory Effects on the Collagen Binding Activities of Integrins $\alpha_1\beta_1$ and $\alpha_2\beta_1$ <i>Sivashankarappa Gurusiddappa, Yi Xu, Rebecca L. Rich, Rick T. Owens, Douglas R. Keene, Richard Mayne, Agneta Höök and Magnus Höök</i>	735
Probing the Importance of the N-Terminal Helix of Parathyroid Hormone: Introduction of Cyclohexylalanine to Tether to the Membrane <i>Maria Pellegrini, Andrea Piserchio, Dale F. Mierke and Jesse Dong</i>	737
Structure-Function Relationship Studies on Parathyroid Hormone (PTH) 1-34 Analogues Containing β -Amino Acid Residues in Positions 11, 12, and 13 <i>Evaristo Peggion, Stefano Mammi, Elisabetta Schievano, Laura Silvestri, Lukas Scheibler, Martina Corich, Alessandro Bisello, Michael Rosenblatt and Michael Chorev</i>	739
Local Conformation Around Position 12 of the (1-34) Fragment of Parathyroid Hormone Probed by Substitution with Aib Residues <i>Evaristo Peggion, Stefano Mammi, Elisabetta Schievano, Laura Silvestri, Lukas Scheibler, Martina Corich, Alessandro Bisello, Michael Rosenblatt and Michael Chorev</i>	742
Positional Cyclization Scanning: A New Method to Evaluate the Bioactive Conformation of Glucagon <i>Jung-Mo Ahn, Dev Trivedi, Peter M. Gitu, Matthew Medeiros, Jennifer R. Swift and Victor J. Hruby</i>	744
Age-Related Decreases of Calcitonin Gene-Related Peptide (CGRP)-Induced Hypotension <i>in vivo</i> and Vasorelaxant Responses <i>in vitro</i> in Rats <i>Gabriel H. H. Chan and Ronald R. Fiscus</i>	746

Contents

A Novel Series of Growth Hormone Secretagogues <i>Vincent Guerlavais, Damien Boeglin, Jean-Alain Fehrentz, Romano Deghenghi, Vittorio Locatelli, Giampiero Muccioli and Jean Martinez</i>	748
Chimeric Mastoparans: Biological Probes and Designer Secretagogues <i>Michelle Farquhar, Ursel Soomets, Ashley Martin, Ülo Langel and John Howl</i>	750
Design of Cyclic α -Defensin Dimers as Channel Forming BuildingBlocks <i>Qitao Yu, Jin-Long Yang and James P. Tam</i>	752
The Effect of Multiple Substitution of Aliphatic Amino Acids on the Structure, Function and Mode of Action of Lytic Peptides <i>Dorit Avrahami, Ziv Oren and Yechiel Shai</i>	754
Three-Dimensional Structure of Big Defensin, a Novel Antimicrobial Peptide Isolated from Horseshoe Crab <i>Naoki Fujitani, Shun-ichiro Kawabata, Tsukasa Osaki, Makoto Demura, Katsutoshi Nitta and Keiichi Kawano</i>	756
Selective Bioactivity of Synthetic Amphipathic Peptides Against Murine Macrophages Infected with <i>Brucella abortus</i> <i>Lars G. J. Hammarström, Ted J. Gauthier and Mark L. McLaughlin</i>	758
Antibacterial Peptides Derived from the C-Terminal Domain of the Hemolytic Lectin, CEL-III <i>Tomomitsu Hatakeyama, Tomoko Suenaga, Takuro Niidome and Haruhiko Aoyagi</i>	760
Low Molecular Weight ψ [CH ₂ NH] Pseudopeptides Yield Potent Antimicrobial Agents <i>David M. Vogel, Sylvie Blondelle and Arno F. Spatola</i>	762
Synthesis and Study of the Antimicrobial Action of Cecropin A-Melittin Hybrids with Aib Substitution <i>Padmaja Juvvadi, Satyanarayana Vunnam, Barney Yoo and Bruce Merrifield</i>	764
Structure-Function Relationship of Gramicidin-Alamethicin Hybrid Analogs <i>Hiroaki Kodama, Mitsukuni Shibue, Kimiko Hashimoto, Hiroshi Yamaguchi, Toshiaki Hara, Masood Jelokhani-Niaraki and Michio Kondo</i>	766
Biaryl-Bridged Lipopeptides from <i>Streptomyces</i> sp. TÛ 6075 <i>Dietmar G. Schmid, Alexandra Hölzel, Graeme J. Nicholson, Stefan Stevanovic, Judith Schimana, Klaus Gebhardt, Johannes Müller, Hans-Peter Fiedler and Günther Jung</i>	768
Generation of Bioactive Peptides Derived from Caseins Using a <i>Lactobacillus helveticus</i> Strain <i>Marie-Claude Robert, Anne Donnet-Hughes and Marcel-Alexandre Juillerat</i>	770
Bioactive Peptides Produced by a Strain of <i>Lactobacillus plantarum</i> : Characterization and Partial Purification <i>Diana M. Müller, Marta S. Carrasco, Arturo Simonetta and Georgina G. Tonarelli</i>	772

Contents

Stilboflavins, a Natural Peptaibol Library from the Mold <i>Stilbella flavipes</i> <i>Hans Brückner and Andreas Jaworski</i>	774
Cyclic Analogues of the Insect Antimicrobial Peptides Drosocin and Apidaecin <i>Marina Gobbo, Monica Benincasa, Laura Biondi, Fernando Filira, Renato Gennaro and Raniero Rocchi</i>	776
Interaction of Antithrombin III-Binding Domain in Heparins with Novel Heparin Binding Peptides <i>Satomi Onoue, Yoshitaka Nemoto, Takahiro Mizumoto, Sunao Harada, Takehiko Yajima and Kazuhisa Kashimoto</i>	778
Antithrombin III-Derived Novel Heparin Binding Peptides Have an Antagonistic Effect on Heparins <i>Satomi Onoue, Sunao Harada, Yoshitaka Nemoto, Takehiko Yajima and Kazuhisa Kashimoto</i>	780
The Octapeptide (Fragment of Differentiation Factor HLDF) Exhibits Nuclease Activity and Induces Apoptosis <i>Valery M. Lipkin, Svetlana M. Dranitsina, Igor I. Babichenko, Igor L. Rodionov, Ludmila K. Baidakova and Irina A. Kostanyan</i>	782
<i>In vivo</i> Proteolytic Hemoglobin Products as Tissue Growth Promoters <i>Olga V. Sazonova, Elena Yu. Blishchenko, Sergei V. Khaidukov, Andrei A. Karelin and Vadim T. Ivanov</i>	785
Synthesis and Pharmacological Activity of Superagonists of the ORL1 Receptor <i>Severo Salvadori, Remo Guerrini, Roberto Tomatis, Girolamo Calo, Raffaella Bigoni, Anna Rizzi, Daniela Rizzi and Domenico Regoli</i>	787
Rational Designing of CXCR-4 Agonists and Antagonists: Synthesis of Novel Cyclam Derivatives of Stromal Cell-Derived Factor (SDF-1) <i>A. Merzouk, C. Tudan, L. Arab, S. Chahal, G. E. Willick and H. Salari</i>	789
A Computational Study of Conformational Properties for <i>N</i> -Methylated Azapeptide Models <i>Ho-Jin Lee, Dong-Kyu Shin, Young-Sang Choi, Chang-Ju Yoon, Kang-Bong Lee and Seonggu Ro</i>	791
Structural Requirements of Non-Mammalian Vasodilatory Peptide Maxadilan, an Excellent Agonist of PACAP Type 1 Receptors <i>Kiyoshi Nokihara, Yoshihiro Nakata, Ethan Lerner, Tadashi Yasuhara and Victor Wray</i>	793
Effect of Deficiency of Cytochrome C Oxidase Assembly Peptide Cox17p on Mitochondrial Functions and Respiratory-Chain in Mice <i>Yoshinori Takahashi, Koichiro Kako, Hidenori Arai, Akio Takehara and Eisuke Munekata</i>	795
Circadian Rhythm Pacemaker Neuropeptide “PDF” in Nocturnal Insect Cricket <i>Gryllus bimaculatus</i> : cDNA Cloning, mRNA Expression, and Nuclear Localization <i>Yoshiro Chuman, Ayami Matsushima, Yasuyuki Shimohigashi and Miki Shimohigashi</i>	797

Contents

Design and Synthesis of the Hydroxamic Acid Variants Antitumorigenic and Antimetastatic Hydroxamate Based Ac-PHSXX'-NH ₂ Sequences <i>Yingchuan Sun and Arno F. Spatola</i>	799
Design, Synthesis and Evaluation of Growth Regulating SDF-1 Peptides on Breast Carcinoma Cells <i>Megan K. Condon, Christy A. Sasiela, Angela H. Brodie and Sandra C. Vigil-Cruz</i>	801
Components of Tissue-Specific Peptide Pools as Negative Regulators of Cell Growth <i>Elena Yu. Blischenko, Olga V. Sazonova, Sergei V. Khaidukov, Yury A. Sheikine, Dmitry I. Sokolov, Irina S. Freidlin, Marina M. Philippova, Andrei A. Karelin and Vadim T. Ivanov</i>	803
HPLC Analysis, Modeling, and Biological Studies of Antiproliferative Heterocyclic Carboxamides <i>János Seprődi, Ferenc Hollósy, Dániel Erős, László Örfi, István Teplán, György Kéri and Miklós Idei</i>	805
Macrophage Chemotactic Response to Elastin-Derived VGVAPG and VGVPG Permutations: A Structure-Activity Relationship and Receptor Binding Assay <i>Maria Portia P. Briones, Satsuki Kamisato, Iori Maeda, Noboru Takami and Kouji Okamoto</i>	807
Peptide Conjugates, Glycopeptides and Lipopeptides, Transmembrane Peptides and Proteins, Receptors and Receptor Interactions, Signal Transduction	
Analysis and Evaluation of Rational Designed Calcium Binding Sites in CD2 <i>Wei Yang, Hsiau-wei Lee and Jenny J. Yang</i>	811
Structural Basis for Selective Binding of Integrins to Extracellular Matrix <i>Barbara Saccà, Eva Schmidt, Johannes A. Eble and Luis Moroder</i>	814
Regulation of the Promoter Binding Activity of a Bacterial Sigma Factor Explored Using Segmental Isotopic Labeling and NMR Spectroscopy <i>Julio A. Camarero, Alex Shekhtman, Elizabeth Campbell, Seth Darst, David Cowburn and Tom W. Muir</i>	816
Chemically Engineering the Prion Protein Using Stepwise SPPS and Expressed Protein Ligation <i>Haydn L. Ball, Giuseppe Legname, Nicole Bradon, Guan Zhengyu, David S. King, Michael A. Baldwin and Stanley B. Prusiner</i>	818
Covalent and Non-Covalent Oligomerization of the Transmembrane α -Helix 4 from the Cystic Fibrosis Conductance Regulator <i>Anthony W. Partridge, Roman A. Melnyk and Charles M. Deber</i>	820
Ctr Δ e13, a Calcitonin Receptor Isoform Lacking 14 Amino Acids in Transmembrane Helix 7: Structure and Topology <i>Maria Pellegrini, Veronique Grignoux, William C. Horne, Roland Baron and Dale F. Mierke</i>	822

Contents

Transmembrane Segment Peptides of the Ff Phage Major Coat Protein Form Parallel Homodimers <i>Roman A. Melnyk, Anthony W. Partridge and Charles M. Deber</i>	824
Refined 3D Model of hMC4R and Docking Study for hMC4R with α -Melanocyte Stimulating Hormone Analogue Ligands <i>Jee-Young Lee, Dong-Il Kang, Seung-Gull Kim and Chang-Ju Yoon</i>	826
Effect of Detergents on Intramolecular Helix-Helix Packing in a Membrane-Based Peptide Derived from CFTR <i>Alex G. Therien and Charles M. Deber</i>	828
Primary Amphipathic Shuttle Peptides: Structural Requirements and Interactions with Model Membranes <i>Frédéric Heitz, Christian Le Grimellec, Jean Méry, Gilles Divita and Nicole Van Mau</i>	830
Synthesis, Purification, and Analysis of the Transmembrane Domain of Phospholamban <i>Patrick S. Wesdock, Phillip W. Banda, Steven C. Hall, Sally U and Gary Lorigan</i>	832
Verification of a μ Opioid Receptor Model by Site-Directed Mutagenesis <i>Carol Fowler, Irina Pogozheva and Henry I. Mosberg</i>	834
Solid-Phase Synthesis and Chemical Ligation of Transmembrane Segments of Rhodopsin <i>Wei-Jun Zhang, Parissa Heshmati, Yunpeng Ye and Garland R. Marshall</i>	836
Ion Gating and Selectivity in Gramicidin A <i>W.L. Duax, V. Pletnev, B.M. Burkhart and M. Glowka</i>	838
Docking of Transmembrane Helices Into Four Helix Bundles in the High Affinity IgE Receptor <i>Mire Zloh, Diego Esposito and William A. Gibbons</i>	841
Helical Net Plots and Surface Lipophilicity Mapping of Transmembrane Helices of Integral Membrane Proteins: Aids to 3D Structure Determination of Integral Membrane Proteins <i>Mire Zloh, Diego Esposito and William A. Gibbons</i>	843
Studies on the Involvement of a His Residue of mt1 GPCR TM Helix V in the Interaction with Melatonin <i>Andrea Calderan, Paolo Ruzza, Donata Favretto, Barbara Biondi, Barbara Scolaro and Gianfranco Borin</i>	845
Biosynthesis and Biophysical Studies of Domains of sTE2P, a Yeast G Protein-Coupled Receptor <i>Enrique Arevalo, David Schreiber, Jennifer Madeo, Boris Arshava, Jeffrey M. Becker, Mark Dumont and Fred Naidler</i>	847
Transmembrane Segment Mimic Peptides Containing Peptoid Residues <i>Yan-Chun Tang, Mitsuko Maeda and Charles M. Deber</i>	849

Contents

Computational Chemistry and Opioidmimetics: Receptor-Ligand Interactions of Dmt-Tic Peptides	851
<i>Sharon D. Bryant, Severo Salvadori, Remo Guerrini, Gianfranco Balboni, Yoshio Okada, Yoshio Fujita and Lawrence H. Lazarus</i>	
Conformational Model of Signal Transduction in the Transmembrane Region of the AT-1 Receptor	853
<i>Gregory V. Nikiforovich and Garland R. Marshall</i>	
Role of the Water Medium in the Process of Signal Transmission from Peptides to Cellular Receptors	855
<i>Evgueny I. Grigoriev, Vladimir Kh. Khavinson, Igor N. Kochnev and Alexey E. Grigoriev</i>	
Structure-Based Design, Synthesis, and Surface Plasmon Resonance (SPR) Detection of Antagonists of the Grb2 SH2 Domain	857
<i>Feng-Di T. Lung, Jia-Yin Tsai, Shu-Yie Wei, Peter P. Roller and Jya-Wei Cheng</i>	
Global Conformational Constraint in the Design of a Grb2 SH2 Domain Inhibitor	859
<i>Yang Gao, Chang-Qing Wei, Johannes Voigt, Jane Wu, Dajun Yang and Terrence R. Burke, Jr.</i>	
Local Conformational Constraint in the Design of a Grb2 SH2 Domain Inhibitor	862
<i>Ding-Guo Liu, Yang Gao, Johannes Voigt, Jane Wu, Dajun Yang and Terrence R. Burke, Jr.</i>	
Further Studies of the Signaling Mechanisms of the Antitumor Somatostatin Analogue TT-232	864
<i>Attila Steták, Tibor Vántus, Gyöngyi Bökönyi, Péter Csermely, Jackie Vandenheede, Axel Ullrich, János Seprödi, István Teplán and György Kéri</i>	
Generation of Cellulose Membrane-Bound Peptides with Free C-Termini: A Useful Approach for PDZ Binding Studies	866
<i>Liyong Dong, Prisca Boisguérin, Jens Schneider-Mergener and Rudolf Volkmer-Engert</i>	
A Focused Library Approach to PTP Inhibitor Discovery Predicated on the X-ray Structure of a PTP1B-Bound Lead Compound	868
<i>Terrence R. Burke, Jr., Ding-Guo Liu, Johannes Voigt, Li Wu, Zhong-Yin Zhang and Yang Gao</i>	
Synthesis of the Ras-RBD Protein Pair	870
<i>Christian F.W. Becker, Christie L. Hunter, Ralf P. Seidel, Stephen B.H. Kent, Roger S. Goody and Martin Engelhard</i>	
The Proline-Rich Antibacterial Peptide Family Inhibits Chaperone-Assisted Protein Folding	873
<i>Laszlo Ötvos, Jr., Goran Kragol, Gyorgyi Varadi, Barry A. Condie and Sandor Lovas</i>

Peptides in Immunology, Synthetic Vaccines, Molecular Mechanisms of Diseases, Peptides in Diagnostics, Pharmacology and Biotechnology, Peptide Delivery Approaches	
Peptide Carrier for Efficient Drug Transport Into Living Cells <i>R. Pipkorn, K. Braun, W. Waldeck, M. Koch, I. Braun and J. Debus</i>	931
Design of Novel Cell Penetrating Peptides <i>Kristen Sadler, Khee Dong Eom and James P. Tam</i>	933
Synthesis and Targeting with Novel Multi-Mannosylated Glycopeptide Modules <i>Goran Kragol, David C. Jackson, Walter Gerhard, Michael Chattergoon, Luis Montaner and Laszlo Otvos, Jr.</i>	935
Liposaccharides: Utilisation for Peptide Delivery and for Enhancing Synthetic Peptide Immunogenicity <i>Istvan Toth, Ross McGeary, Joanne Blanchfield, Handoo Rhee, Paul Alewood, David Adams and Michael Good</i>	937
Down-Regulation of HIV-1 <i>Long Terminal Repeat</i> Controlled Viral Transcription by DNA-Binding, Arginine-Rich Fusion Proteins Derived from HIV-1 TAT for the Direct Delivery into the Nucleus <i>Stefan R. K. Hoffmann</i>	940
New Insights Into the Membrane Translocating Process of the Tat Peptide Used for Cellular Delivery of Various Biological Molecules <i>Eric Vivès, Michelle Silhol and Bernard Lebleu</i>	942
DUROS(r) Osmotic Implant for the Delivery of Peptides and Proteins <i>Jeremy Wright, James Matsuura, Stephen Berry and Catherine Lucas</i>	944
Utilization of ICAM-1 Peptide Conjugates for Drug Targeting to T-Cells <i>Christine R. Xu, Meagan E. Anderson, Tatyana V. Yakovleva and Teruna J. Siahaan</i>	946
Regulation of Cadherin-Cadherin Interaction: Secondary Structure of the HAV and ADT Peptides Derived from Human E-Cadherin Sequence <i>Christine R. Xu, Ernawati Sinaga, Irwan T. Makagiansar and Teruna J. Siahaan</i>	948

Contents

Translocation of Various Arginine-Rich Peptides and the Potential of These Peptides as Carriers for Intracellular Protein Delivery <i>Shiroh Futaki, Tomoki Suzuki, Wakana Ohashi, Takeshi Yagami, Seigo Tanaka, Kunihiro Ueda, and Yukio Sugiura</i>	950
Reversible PEGylation: Thiolytic Regeneration of Active Protein from Its Polymer Conjugates <i>Samuel Zalipsky, Radwan Kiwan and Nasreen Mullah</i>	953
Lipoamino Acid and Liposaccharide Conjugated Peptides: Enhancement of Bioavailability <i>Yiu-Ngok Chan, Allan K. Wong and Istvan Toth</i>	955
Regulation and Multiplicity of Peptide Transporters in Model Systems <i>Jeffrey M. Becker, V. Narita, A. Wiles, M. Hauser, S. Koh, G. Stacey and F. Naider</i>	957
A Novel Class of Cell Permeable “Karyophilic” Peptides: NLS-Mediated Nuclear Import of Dermaseptin Derived Peptides in Intact Cells <i>Elana Hariton-Gazal, Chaim Gilon, Amram Mor and Abraham Loyter</i>	959
Characterization of Translocation Behavior of Arginine-Rich Membrane-Permeable Peptides <i>Tomoki Suzuki, Wakana Ohashi, Ikuhiko Nakase, Seigo Tanaka, Kunihiro Ueda, Shiroh Futaki and Yukio Sugiura</i>	961
Structure and Activity of the N-Terminal Peptides of HIV-1 Glycoprotein 41 Types M (Major) and O (Outlier) <i>Patrick W. Mobley, Alan J. Waring and Larry M. Gordon</i>	963
Specific Cleavage at Lys-147/Gly-148 in the Serine Protease Domain of Human Factor IXa β by Plasmin: Effect on Catalytic Efficiency and Factor VIIIa Binding <i>Amy E. Schmidt and S. Paul Bajaj</i>	965
Stability and Peptide Binding Specificity of BTK SH2 Domain: Molecular Basis for X-Linked Agammaglobulinemia <i>Shiou-Ru Tzeng, Ming-Tao Pai, Feng-Di T. Lung, Peter P. Roller, Benfang Lei, Shiao-Chun Tu, Shi-Han Chen, Wen-Jue Soong and Jya-Wei Cheng</i>	967
Designing Peptide Drugs/Ligands for Pathological States. A New Paradigm for Design of Bioactive Peptide Hormones and Neurotransmitters <i>Victor J. Hruby, Richard S. Agnes, Yeon-Sun Lee, Peg Davis, Shou-Wu Ma, Josephine Lai and Frank Porreca</i>	969
Alternate Aggregation Pathways of Alzheimer β -Amyloid Peptides <i>Paul Gorman, Christopher M. Yip, Paul E. Fraser and Avijit Chakrabarty</i>	971
Diabetes mellitus (DM) Causes Severe Impairment of Hypotensive Responses <i>in vivo</i> and Vasorelaxant Responses <i>in vitro</i> to the Neuropeptide CGRP <i>Ronald R. Fiscus, Gabriel H. H. Chan and Arisina C. Y. Ma</i>	973
Triple-Helical Peptide Analysis of Collagenolytic Protease Activity <i>Gregg B. Fields, Janelle L. Lauer-Fields, Thilaka Sritharan and Hideaki Nagase</i>	975

Contents

Design of More Potent, Radioiodinatable and Fluorescent Vasopressin Hypotensive Peptide Agonists <i>L. L. Cheng, S. Stoev, M. Manning, N. C. Wo and W. Y. Chan</i>	978
Antagonism of the Neurochemical Effect of Thyrotropin-Releasing Hormone by Its Peptide Analog <i>Laszlo Prokai, Alevtina Zharikova, Vien Nguyen and Xiaoxu Li</i>	980
Synthesis of Selective Substrates for Syk PTK <i>Paolo Ruzza, Andrea Calderan, Arianna Donella-Deana, Luca Cesaro, Stefano Elardo, Lorenzo A. Pinna and Gianfranco Borin</i>	982
Synthesis of Potent and Enzymatically Stable 4- ¹⁸ F-Benzoyl-NT(8-13) Analogs for Tumour Diagnosis Using PET <i>K. Ierbeke, R. Bergmann, B. Johanssen, G. Török, G. Laus and D. Tourwe</i>	984
<i>In vivo</i> Imaging of Protease Activity and Drug Screening <i>Ching-Hsuan Tung, Christoph Bremer and Ralph Weissleder</i>	986
Passive Repression of HIV-1 Long Terminal Repeat Enhancer Controlled Viral Transcription in HIV-1 Infected Cells by Cationic DNA-Binding Fusion Proteins <i>S. R. K. Hoffmann, L. Bisset, J. Schüpbach and B. Gutte</i>	988
Passive Repression of HIV-1 Long Terminal Repeat Controlled Viral Transcription by Site-Directed Combinatorial Design of Artificial DNA-Binding Proteins Screened from Combinatorial Chemical Libraries <i>Stefan R. K. Hoffmann</i>	990
Fluorescent Biosensor for CrkII Phosphorylation by the Abl Tyrosine Kinase <i>Roseanne M. Hofmann, Graham J. Cotton, William Bornman, Emmanuel Chang and Tom W. Muir</i>	992
Antibodies to Distinct Protein Epitopes from a Single Polyclonal Serum <i>Ella A. Yurkina, Vyacheslav I. Ofitserov, Vladimir V. Samukov, Aydar N. Sabirov and Georgy A. Mizenko</i>	994
Epitope Mapping of Anti-Type I Collagen Crosslinked N-Telopeptide Antibody with Synthetic Peptides <i>Huey-Yi Chen, Yen-Meng Liou, Chiu-Heng Chen, Shing-Tzu Lin and Feng-Di T. Lung</i>	996
The Use of a Synthetic Biotinylated Peptide Probe for the Isolation of Adenomatous Polyposis Coli (APC) Tumor Suppressor Protein Complexes <i>Bruno Catimel, John D Wade, M. Faux, Anthony Burgess, Laszlo Otvos, Jr. and Edouard Nice</i>	998
Folding and Peptide Binding of TPR Motifs from SGT <i>Ming-Tao Pai, Chih-Sheng Yang, Shiou-Ru Tzeng, Chung Wang and Jya-Wei Cheng</i>	1000
CCT mRNA and CREB Phosphorylation Up Regulated by Peptide ZNC(C)PR in Rat Hippocampus <i>Yu-cang Du, Kan-yan Xu, Ying Xiong, Ming Dong and Xiu-Fang Chen</i>	1002

Contents

A Combination of HER-2 Peptide Epitope Vaccines Mediate Superior Biological Effects <i>Pravin T.P. Kaumaya, John Pyles and Naveen Dakappagari</i>	1004
Multivalent Vaccine Studies for HTLV-1 Associated Diseases <i>Roshni Sundaram and Pravin T. P. Kaumaya</i>	1006
Evaluation of HTLV-1 Cytotoxic T-Cell Epitopes in HLA-A2.1 Transgenic Mice <i>Roshni Sundaram, Christopher M. Walker and Pravin T. P. Kaumaya</i>	1008
New Branched Polypeptide Based Epitope-Conjugates: Synthesis and Immunorecognition <i>Ferenc Hudecz, Gábor Mezö, Nikolett Mihala, Balázs Dalmadi, Szilvia Bösze, David Andreu, Sytske Welling-Wester, Eva Rajnavölgyi and Gjalt Welling</i>	1010
Evaluation of Synergistic Interaction Between Cytokines and Peptide Epitope Vaccines in Protection Against HER-2 Expressing Lung Metastases <i>Naveen Dakappagari, Robin Parihar, John Pyles, William E. Carson and Pravin T. P. Kaumaya</i>	1012
Novel Classes of Neutrophil-Activating Peptides: Isolation and Their Physiological Significance <i>Hidehito Mukai, Yoshinori Hokari, Tetsuo Seki, Hiroko Nakano, Toshifumi Takao, Yasutsugu Shimonishi, Yoshisuke Nishi and Eisuke Munekata</i>	1014
Affinity of the HIV-1-Neutralizing Monoclonal Antibody 2F5 for gp41 ELDKWA Peptide Analogues <i>Yu Tian, Chintala V. Ramesh, Xuejun Ma, Tanaz Patel, Myles Tiscione, Teodorica Cenizal, John W. Taylor, Gail Ferstandig Arnold and Edward Arnold</i>	1016
A Discontinuous Antigenic Site Is Functionally Reproduced by Synthetic Peptide Constructions <i>Judit Villén, Eva Borràs, Mercedes Dávila, Esteban Domingo, Wim M. M. Schaaper, Rob H. Melen, Ernest Giralt and David Andreu</i>	1018
Four-Segment Tandem Ligation of Proteins with Unusual Branched Architecture <i>K. D. Eom, Z. Miao and J. P. Tam</i>	1021
Identification and Optimization of HIV-Specific CTL Antigens for Vaccine Design <i>César Boggiano, Clemencia Pinilla, Bruce D. Walker and Sylvie E. Blondelle</i>	1023
The Natural T-Helper Cell Epitope Repertoire is Unlikely to Contain Glycopeptides with Extended Carbohydrate Side-Chains <i>Laszlo Orvos, Jr., Hildegund C. J. Ertl and Mare Cudic</i>	1025

Contents

- Peptide Analogues of a Subdominant Epitope Expressed in EBV-Associated Tumors: Synthesis and Activity [1027](#)
Mauro Marastoni, Martina Bazzaro, Fabiola Micheletti, Riccardo Gavioli and Roberto Tomatis
- Synthetic Epitopes from Equine Infectious Anemia Virus (EIAV) Surface and Core Proteins [1029](#)
Adriana Soutullo, María Santi, Juan C. Perin, Javier Lottersberger, Leila Beltramini and Georgina Tonarelli
- B-Cell Linear Epitopes in the Conservative Regions of Hepatitis C Virus Envelope Glycoproteins [1031](#)
Ekaterina F. Kolesanova, Ludmila V. Olenina, Boris N. Sobolev, Ludmila I. Nikolaeva and Alexander I. Archakov
- Synthesis of a Covalently Reactive Antigen Analog Derived from a Conserved Sequence of HIV-1 gp120 [1033](#)
Hiroaki Taguchi, Yasuhiro Nishiyama, Gary S. Burr, Sangeeta A. Karle and Sudhir Paul
- Isolation, cDNA Cloning, and Chemical Synthesis of *Oryctes rhinoceros* Defensin [1035](#)
Jun Ishibashi, Hisako Saido-Sakanaka and Minoru Yamakawa
- Deamidation within a γ -Gliadin-Derived Peptide Enhances Its Recognition by Serum Antibodies of CD Patients [1037](#)
Florian v.d. Muelbe, Thomas Mothes, Holm Uhlig, A. A. Osman, Toni Weinschenk, Dietmar G. Schmid, Günther Jung and Burkhard Fleckenstein
- Identification of Conserved HIV-1-Derived Helper T Lymphocyte Epitopes Using Synthetic Peptides and High Throughput Binding Assays [1039](#)
Yuichiro Higashimoto, Cara C. Wilson, Brent Palmer, Scott Southwood, John Sidney, Ettore Appella, Robert Chesnut, Alessandro Sette and Brian D. Livingston
- Determining the Fate of Glycopeptides During Antigen Processing in Antigen Presenting Cells [1041](#)
Rodney Gagné, Shiro Komba, Teis Jensen, Monika Gad, Ole Werdelin and Morten Meldal
- Evaluation of Immune Response Elicited by Peptide Libraries Against Foot-and-Mouth Disease Virus [1043](#)
Eliandre de Oliveira, Miguel Ángel Jimenez-Clavero, José Ignacio Núñez, Francisco Sobrino, Ernest Giralt and David Andreu
- Peptoid-Peptide Hybrids: Design, Synthesis and MHC Binding [1045](#)
Ellen C. de Haan, Marca H. M. Wauben, Mayken C. Grosfeld-Stulemeyer, John A. W. Kruijtzter, Rob M. J. Liskamp and Ed E. Moret
- Synthetic Glycopeptide Models of MUC1 Core Protein [1047](#)
Mare Cudic, David J. Craik and Laszlo Otvos, Jr.

Contents

Cathepsin D Produces the Potent Antimicrobial Peptide Parasin I from Histone H2A in Scaleless Fish Skin <i>Ju Hyun Cho, In Yup Park and Sun Chang Kim</i>	1049
Characterization of Highly Stimulatory T Cell Ligands Identified Using Positional Scanning Libraries <i>Eva Borràs, Bruno Gran, Roland Martin and Clemencia Pinilla</i>	1051
Proteomics Approach for Identifying Interacting Partners of a C-Terminal Functional Peptide Derived from the Tumor Suppressor, p21 ^{cip/waf1} <i>Tarikere L. Gururaja, Weiqun Li, Tong Lin, Donald G. Payan and D. C. Anderson</i>	1053
Cuvette-Based Biosensors as Micropreparative Affinity Surfaces <i>Bruno Catimel, Julie Rothacker and Ed Nice</i>	1055
A Comprehensive Database of Protein-Protein Interactions <i>J. Mark Carter, Michael James, Brian Korenstein, Juan Herrero, Brian Miller, Hai Hu, Ruslana Zhitnitsky, Christine Luczak and Lin Chen</i>	1057
Cell Attachment and Neurite Outgrowth Activities of Laminin Peptide-Conjugated Chitosan Membrane <i>Motoyoshi Nomizu, Mayumi Mochizuki, Kozue Kato, Ikuko Okazaki, Yoko Wakabayashi, Taku Sato, Satoshi Rikimaru, Yuichi Kadoya, Nobuo Sakairi and Norio Nishi</i>	1060
Peptide-Amphiphile Induction of α -Helical Molecular Architecture and Interaction with Biomaterial Surfaces <i>Navdeep Malkar, Neal Niemczyk and Gregg B. Fields</i>	1063
TOAC Peptides as Catalysts of Enantioselective Oxidations <i>Claudio Toniolo, Marco Crisma, Fernando Formaggio, Marcella Bonchio, Quirinus B. Broxterman, Bernard Kaptein, Rosa Maria Vitale, Ettore Benedetti and Michele Saviano</i>	1065
Synthesis of Arg-Gly-Asp-Ser Containing Oligopeptides and Evaluation of Their Cell-Attachment Activity <i>Tadashi Iuchi, Mitsutaka Kayahara, Keiko Sato, Yoshiaki Hirano, Masahito Oka and Toshio Hayashi</i>	1067
